

RAT-Backend Documentation

“

"Quick, clever, and always finding a way through." — the rats theme.

This template demonstrates the **rats** markdown theme. Copy this file as a starting point for new documents, or just add the stylesheet link at the top of an existing one:

```
<link rel="stylesheet"
href="style/rats.css">
```

Headings

Third level

Fourth level

Text styling

You can write **bold**, *italic*, ***both***, ~~strikethrough~~, and `inline code`. Links look like [this one](#), and keyboard shortcuts render as **Ctrl** + **S**.

Blockquotes

“

Rats are remarkably social creatures. They groom each other, play, and even laugh when tickled — a high-frequency chirp inaudible to humans.

Lists

- 🐾 First scurry
- 🐾 Second scurry
 - 🐾 A nested burrow
 - 🐾 Another tunnel
- 🐾 Third scurry

1. Sniff
2. Investigate
3. Nibble

Code block

```
SELECT r.name, COUNT(s.id) AS sightings
FROM rats r
LEFT JOIN sightings s ON s.rat_id = r.id
GROUP BY r.name
ORDER BY sightings DESC;
```

Tables

Column	Type	Description
id	SERIAL	Primary key
name	VARCHAR(64)	Rat's given name
fur_color	VARCHAR(32)	Brown, black, agouti, ...
last_sighting	TIMESTAMPTZ	Most recent appearance

Images

1. Normalform (NF1)
